The fontawesome package High quality web icons

Xavier Danaux*(Original LATEX code)
Nazar Gerasymchuk†(New LATEX code)
Geoffrey Gouez‡(New LATEX code)
Dave Gandy (font and icons design)

Version 4.1.0, released on May 29, 2014

Abstract

The fontawesome package grants access to 439 web-related icons provided by the included *Font Awesome* free font, designed by Dave Gandy and released under the open SIL Open Font License².

This package requires the fontspec package and either the $X_{\overline{A}}(I_{\overline{A}})T_{\overline{E}}X$ or Lua(I_{\overline{A}})T_{\overline{E}}X engine to load the included off font.

1 Introduction

It is a redistribution of the free (as in beer) Font Awesome of font with specific bindings for (A)TEX.

2 Requirements

The fontawsome package requires the fontspec package and either the $X_{\Xi}(E)T_{E}X$ or Lua(E) $T_{E}X$ engine to load the included off font.

^{*}E-mail: xdanaux@gmail.com

[†]Github: Troyane

[‡]Github: Cicatrice

¹See http://fortawesome.github.com/Font-Awesome for more details about the font itself

²Available at http://scripts.sil.org/OFL.

3 Usage

\faicon

Once the fontawesome package loaded, icons can be accessed through the general $\fint \fint \fi$
